

SCT's actual/approved research expenditure, 2007-2010 (approximate figures)

[For details of projects, see Research Overview]

	<u>2007*1</u>	<u>2008*1</u>	<u>2009*1</u>	<u>2010*1</u>
National surveillance programme	6000	6000	7381	7848
Antigen research (Inst. of Neurology/ Inst. of Cell & Molecular Science)	8000	-	-	-
Dourmashkin (London Met. Univ.)	2000	-	-	-
Vilensky database/related research (Univ. of Indiana Med. School)	3000*2,3	2750*3	-	-
Vilensky seminar in London	-	1000	-	-
Anti-basal ganglia antibodies conference in Bari (Giovannoni/Holden)	-	2000	-	-
Sophie Cameron Trust Ph.D. Studentship at QMUL (Giovannoni/Baker)	-	22,670	23,670	24,670
Vilensky - research assistant for Oxford University Press book on EL	-	20,000*3	-	-
<u>Totals:</u>	19,000*1	54,420	31,051	32,518

Notes

*1 Figures for 2007 not reconciled with accounts. Expenditure for 2008-2010 refers to amounts approved (most of those for 2008 have already been paid).

*2 Includes USD 500 to Dr. Mukhamedzyanov (Kazan State Medical University).

*3 US Dollar amounts shown at exchange rate of \$2 = £1 (close to actual at the time payments were made).

Pre-2007 spending: Physiotherapy research (Royce Clinic) about £72,000 and first antigen research grant to Institute of Neurology £6000.

- **Total actual/approved spending to 2010: approximately £215,000**
